

Professional Summary

UI/UX Designer with 4+ years of experience across enterprise software, web, and mobile. Worked with global clients, PMs, developers, and stakeholders to ship products that actually work. Hands-on with Power BI, Tableau, design systems, and most recently — building AI agent experiences.

Work Experience

Clarivate, Noida | UI / UX DESIGNER | July 2025 - Present

- The only designer across 6 products — working daily with 3 PMs and dev teams, taking designs from first wireframe all the way to handoff
- Regularly doing user research, usability testing, and stakeholder interviews to design and improve patent filing apps and internal back-office tools
- Actively leading UX for an agentic AI patent filing assistant — working on conversational flows, UI patterns, and Figma prototypes every sprint
- Keeps the design system growing — building and maintaining reusable UI components, graphics, and illustrations used across web and mobile
- Goes between product, engineering, and business teams daily — running stakeholder reviews and design critiques to keep everyone aligned
- Regularly taking marketing websites and landing pages from wireframe to final CSS-based launch

Zensar Technologies, Pune | UI / UX DESIGNER | July 2022 - July 2025

- Built a scalable enterprise design system from scratch — improved UI consistency and reduced development time by 40% across teams
- Designed Power BI and Tableau dashboards for U.S. clients and built SharePoint enterprise portals — making complex data easier to act on for business and exec teams
- Worked closely with PMs, QA, and developers every sprint to make sure designs were technically feasible and hitting the right business goals
- Delivered cross-platform user flows and prototypes meeting WCAG accessibility standards — ran usability and A/B testing that improved task completion rate by 30%
- Worked in agile design sprints — kept feedback loops short and cut delivery cycles by 50% without losing design quality

HOP Electric, Jaipur | UI / UX DESIGNER INTERN | May 2022 - July 2022

- Designed and launched a responsive EV booking website — drove a 25% increase in pre-bookings within the first month
- Built interactive configurators and 3D visualizations that improved user engagement by 20%
- Ran user research and usability testing that brought navigation bounce rates down by 15%
- Delivered pixel-perfect interfaces end to end under a 2-month deadline — recognized by leadership for quality and speed
